

EXAM REFERENCES 2017-2018

The reference list below represents the materials used to support exam items during the 2017-2018 exam year (April to February), as determined by the subject matter experts of the BOC Exam Development Committee (EDC). Every item is referenced twice to ensure a consensus exists on each item. Please note that a specific “edition” and “year” for each reference is not included in the list for the purpose of simplification. During the exam development process, the BOC uses the most current edition of a reference when constructing items.
