BOC

MAINTAINING YOUR CERTIFICATION

Compliance with the *BOC Standards of Professional Practice*, emergency cardiac care (ECC), maintenance fees and continuing education (CE) is required to maintain your certification.

Adherence to *BOC Standards of Professional Practice*

ATs are expected to comply with the *BOC Standards of Professional Practice* at all times. A copy of the document is available on the BOC website at www.bocatc.org.

Certification in ECC

ATs must be able to demonstrate **ongoing** certification in the competencies outlined in the BOC's **ECC guidelines** throughout the reporting period. CEUs are not awarded for maintaining ECC.

NOTE: ECC certification must be current each year. Depending on the ECC provider, ECC recertification may not be required each year.

ECC must include all of the following:

- Adult CPR
- Pediatric CPR
- Second rescuer CPR
- AED
- Airway obstruction
- Barrier devices (e.g., pocket mask, bag valve mask)

Acceptable ECC providers are those adhering to the most current *International Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiac Care*.

Examples of courses that provide the above requirements include, but are not limited to:

- CPR/AED for the Professional Rescuer through the American Red Cross
- BLS Healthcare Provider through the American Red Cross
- BLS Healthcare Provider through the American Heart Association

NOTE: Online ECC courses are only acceptable IF skills are demonstrated and tested in person by a qualified instructor.

NOTE Regarding Instructor Cards: The BOC accepts the American Heart Association BLS Healthcare Provider Instructor or American Heart Association BLS Instructor card. All other instructor cards are unacceptable unless the provider can confirm, in writing, that their instructors are required to maintain and successfully demonstrate provider skills to renew their instructor status.

The BOC reserves the right to request ECC documentation at any time; this includes, but is not limited to, the BOC audit. ATs must retain all ECC documentation that was current during the reporting period for at least 4 years after the end of the reporting period. The only acceptable documents are original certification cards, original certificates of completion or photocopies (front and back) of certification cards or certificates of completion. The instructor and card holder must sign cards or certifications of completion if a QR code is not provided. Letters provided by instructors are not acceptable.

Payment of Certification Maintenance Fees

The annual certification maintenance fee supports the administrative, disciplinary, regulatory and professional development activities required of the BOC to retain NCCA accreditation and assure protection of the public. NCCA accreditation highlights the essential elements of a high-quality program and is necessary for continued recognition of ATs by employers and regulators that identify the BOC exam and CE requirements in their state statutes, rules and regulations. Every AT has been required to pay the certification maintenance fee since 1992. The BOC will waive the certification maintenance fee for ATs who are certified in the same year the fee is assessed. The fee is non-refundable.

CE requirements are intended to promote continued competence, development of current knowledge and skills and enhancement of professional skills and judgment. CE programs must focus on increasing knowledge, skills and abilities related to the practice of athletic training. CE programs must be intended for credentialed healthcare providers and wellness professionals.

As information continually changes, it is important for professionals to learn the latest about athletic training.

CE requirements are meant to ensure that ATs continue to:

- Stay on the cutting edge in the field of athletic training
- Obtain current professional development information
- Explore new knowledge in specific content areas
- Master new athletic training related skills and techniques
- Expand approaches to effective athletic training
- Further develop professional judgment
- Conduct professional practice in an ethical and appropriate manner

Role Delineation Study/Practice Analysis – The rapid advancements in athletic training related knowledge make maintaining a minimal level of competence a continuous and ongoing responsibility of every practitioner regardless of employment location. Continued learning and maintaining competence as a healthcare provider are important aspects of

professionalism, which have not gone unnoticed by society; in fact, society demands that all professionals are qualified and competent within their respective fields. In the US healthcare arena, the half life of medical knowledge has been measured to be five years with the amount of information doubling every 18 months. Therefore, the BOC performs a role delineation study or practice analysis approximately every 5 years and requires that ATs report CE programs every 2 years to encourage and assure an AT's ongoing competence in the ever changing landscape of healthcare knowledge and skill.

The *BOC Role Delineation/Practice Analysis (RD/PA)* defines the current entry level knowledge, skills and abilities required for practice in the profession of athletic training. It contains the entry level standards of practice, the domains of athletic training, an entry level job analysis and a review of literature containing over 350 publications. In addition to serving as the blueprint for the BOC exam, it serves as a guide in determining relevant content areas for CE programs. Copies of the current RD/PA may be ordered online at www.bocatc.org.

CEU Calculation – CEUs are based on contact hours. Contact hours are defined as the number of actual clock hours spent in direct participation in a structured education format as a learner. One CEU is equivalent to 1 contact hour. CEUs will be awarded only for programs that are completed within your reporting period. CEUs in excess of the amount required cannot be carried over for credit in subsequent reporting periods. CEUs cannot be earned prior to certification.

Documentation – Original documentation confirming participation in a program must be kept for 4 years after the reporting period has ended (see category description for documentation specifics).

CE Classification – There are 2 levels of CE with different categories in each level. **Level I** categories are for competence activities and programs that require a level of BOC approval. **Level II** categories are competence activities and programs that do not require BOC approval. Each category specifies a minimum and/or a maximum number of CEUs.

CE Categories – The charts below describe each category and provide possible programs that may qualify for the category, the number of CEUs and the required documentation that will be needed IF you are audited. ATs only submit required documentation if they receive an audit notification from the BOC. **All CE programs described for each category must be intended for an audience of credentialed healthcare and/or wellness providers (i.e., ATs, PTs, RNs, PAs, PTAs, MDs, CPTs) and the content must be at least entry-level and pertain to the domains identified in the Role Delineation Study/Practice Analysis, Sixth Edition.**
